

TENANT BULLETIN

Proper Waste Disposal and Use of Dumpsters on Airport Property

WHAT: Appropriate use of dumpsters available on airport property.

WHY: Maintaining cleanliness and orderliness in waste disposal practices is essential for the safety and well-being of all airport users. Republic Services will not pick up overfilled dumpsters.

NOTE: Guidelines to follow when utilizing airport dumpsters:

Authorized Use Only: Dumpsters are provided solely for the disposal of non-hazardous waste generated within your leased premises. Please refrain from using airport dumpsters for personal or unauthorized purposes.

Avoid Overloading: Refrain from overfilling dumpsters beyond their capacity. Overloaded dumpsters create safety hazards and may result in spillage or damage to property.

Prohibited Items: Do not dispose of hazardous materials, liquids, electronics, tires, or any other prohibited items in the dumpsters. These materials require special handling and should be disposed of in accordance with local regulations.

Bagged Waste: All waste should be securely bagged before disposal to prevent littering and minimize the risk of attracting pests. Loose debris should not be left in or around the dumpster area.
